Art Unit: 1616

Regarding applicant's request for the return of an initialed 1449 filed 7/25/03, the form does not appear to have been made of record in the PTO's electronic file.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11-13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 8-13 and 1-5 of US patents 5,728,721, and 6,133,301 respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of '301 encompass the instant claims regarding xenografts. Claims 8-13 of '721 encompass the instant claims regarding the acute and chronic rejections of the xenografts.

The above rejection over '301 may be considered provisional pending approval of the TD filed 12/15/06 over the '301 patent. Regarding the '721 patent, applicant

argues that claims 8-13 do not contain the limitation of acute or chronic rejection and, thus, cannot be considered to encompass the instant claims. However, in column 1 lines 25-61 the '721 patent, the various types of immune rejection are delineated. The fact that the patentee does not claim a particular type of rejection would be interpreted by one of ordinary skill to mean that the patentee intends to claim all the types of immune rejections disclosed, encompassing the instant types claimed.

No claims allowed.

Applicant is advised that, upon allowable subject matter, the issue of whether there is interfering subject matter between the instant claims and those of US patent 5,688,824 will be considered.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
